

## Developing a plan

### Handout CTP5

Work with your ensemble to examine and reflect on the stages of the process of collaboratively creating original theatre, outlined in the table below. This table presents one possible process for the collaborative creation of a piece of theatre.

	Process	Approach	Outcome
Preparation	Research	Generation of ideas	Inspirations and material
Exploration	Experimentation	Exercises and discussions	Intention, impact and approach
Shaping	Structuring	Organization of ideas and material	Form and style/fixing meaning
Realization	Preparation	Rehearsal and production	Performance

Discuss these stages with your group and develop action points for your own process. Use the space below to develop your own chart, recording the stages of the process, milestones and deadlines. You might wish to use this as a starting point for a planner to help you organize your work.
