

What was my contribution?

Handout CTP9

You will need to select footage from the video recording of the live theatre piece to show the examiner what your artistic intentions and contributions were and how these were carried out. You might choose to focus on a moment that you had a hand in creating, a moment when you performed, a section you directed or a moment that shows your lighting design. This focus will be dependent on what your focus has been in the creation and presentation of the collaborative piece.

To help you identify the best moments, fill in the chart below to outline what your responsibilities were in each of these specialist roles. You will undoubtedly be able to write more in some boxes than others. You can leave some boxes blank, but everyone should have contributed to the theatre piece's creation.
