

Developing material

Handout TTIP7

The graphic below illustrates a possible process for the development of your solo piece once it has been created.

Use the graphic below to begin recording your development process and interactions with your mentor. Use the large box to identify what you would like your mentor to advise you on and the smaller box to record your mentor's advice and recommendations. The next box should show how your mentor's advice has had an impact on the development of the work.
